

AMPLE CAPACITY AND THE COMFORT TO MATCH

THE BOBCAT G25N-7 PNEUMATIC FORKLIFT

The Bobcat® G25N-7 pneumatic forklift boasts major lifting power and all-day comfort in one machine. With a rated capacity of 5,000 pounds, it can take on large lifting jobs in warehouses and industrial applications. And with operator-friendly features like a roomy compartment, an adjustable steering column and a large LED display, it's enjoyable to operate.

Oil-Cooled Disc Brakes

This best-in-class braking system provides superior, long-lasting stopping power and is backed by a five-year or 10,000-working-hour warranty.

Robust Hydrostatic Steer Axle

With fewer moving parts, the hydrostatic steer axle provides low-effort steering with easy maintenance and a longer service life.

Operator Sensing System (OSS)

For increased safety during operation, the OSS automatically locks mast functions when the operator leaves the seat.

Get Home Mode

Get Home Mode protects the vehicle from extreme transmission oil and engine coolant temperatures, preventing potential damage to crucial components in the event of overheating.

Auto Tilt Leveling System

An optional feature, the auto tilt leveling system stops the mast at a vertical position to protect the load and prevent uneven stacking that may potentially cause product damage.

Dual Element Air Cleaner

A dual element air cleaner offers added protection to the engine's air intake, extending engine life and reducing maintenance costs.

Easy Access to Service Areas

Servicing the vehicle is easy thanks to tool-free floor plates and a spring lock that automatically engages when the engine cover is raised.

Standard Safety Features

Standard features like a strobe light, backup alarm and side mirrors offer increased safety and ease of operation.

Well-Placed LED Display

A large, bright LED display continuously monitors all vital systems to keep the operator informed of truck performance and health.

Comfortable Operator Space

Designed for comfort, the operator space features a roomy compartment, optimized pedal positions, and an adjustable steering column and seat that allow the operator to easily find their optimum driving position.
